EXPLANATION OF NOTES

- Designating symbols (mechanical designation) will be assigned to car owner or lessee by the Secretary, Technical Services, Association of American Railroads, upon written application.
- For mileage allowance purposes, the service year of a car is calculated based upon year of construction of underframe. A car's first service year is the year built. Its second service year begins on January 1 of the year following the year built, with succeeding service years starting on January 1 of each following year. If the tanks' service year exceeds 30, the car's service year is considered to be in excess of 30 regardless of year of construction of underframe. For those cars constructed without an underframe, the car's service year is calculated based upon year of construction of tank. Service year is determined by subtracting the year of construction (built/rebuilt) from the current calendar year, plus 1, e.g., (2000 - 1970) + 1 = 31, or Service Years 31 and over allowance bracket.
- For cars built prior to January 1, 1968, assignment of owned or leased cars to value groups will be determined by the undepreciated base classification value. In addition, capitalized additions and betterments shall be added to the value if not already included in the BCV system.

EXPLANATION OF NOTES

4. Applies as follows:

- For cars built between January 1, 1968 and July 1, 1991, assignment of owned or leased cars to value groups will be determined by the original cost as represented to the original buyer by the manufacturer's invoice price at the time of original installation into service. In the case of a manufacturer-lessor, the fair market value or the value which was certified, or would have been certified, for investment tax credit purposes shall be substituted therefore.
- Assignment to value groups of cars placed into service after July 1, 1991, will be determined by the original cost of the car to the original buyer as stated in the manufacturer's invoice. In only two circumstances, owners may certify an alternative "true value" in lieu of invoice price: (a) manufacturers who retain cars for their own leasing service; and (b) purchasers who can demonstrate that they contributed physical assets of significant value that were used by the manufacturer in fabricating a car, resulting in a reduction of the invoice price by more than \$1,000 per car below the price that otherwise would have been charged. For manufacturers, "true value" is the price for which a car or group of cars manufactured as a group would have been sold in an arm's length transaction. For purchasers who have made a qualifying contribution to fabrication, "true value" is the invoice price plus the depreciated value of the contributed assets distributed over the cars for which the assets were used, subject to the same limitations on "true value" which would apply to a manufacturer.

"True value" shall not exceed the average price of similar cars registered in UMLER at invoice price within the most recent 12 months for which registration information is available in UMLER, adjusted for changes in the market values of new tank cars as reflected in average car prices. If the AAR determines by audit that a certified "true value" exceeds this value limit by an amount that causes a car to be placed in a higher allowance value bracket, the value of the car will be reduced to the appropriate value bracket. In addition, if the AAR determines by audit that a certified "true value" exceeds this value limit by an amount that causes a car to be placed in allowance value bracket more than one bracket above the otherwise applicable brackets, excess allowances paid as a result of the over valuation shall be reimbursed to the paying railroads.

Those owners who certify a "true value" in lieu of invoice price during the calendar year must provide to the AAR an officer's certificate at the end of the year stating that, based on all information available to the owner, the owner has complied with the terms of this item. Car owners must supply for entry into UMLER all information required for tank cars in the UMLER Specification Manual. Notwithstanding any other provision of this tariff item, "true value" will be subject to audit directly by the AAR.

- If applicable, initial into service transportation costs, capitalized original lining costs, capitalized additions and capitalized betterments shall be added to car values determined pursuant to Paragraph A and B, above, if not already included in the value of the car. For cars built after January 1, 1988, capitalized inspection costs shall be added to the value, if applicable and if not already included in the value of the car. Values other than invoice price shall be identified in accordance with the current AAR UMLER format at the time cars are submitted to the Secretary Business Services, AAR, for registration in the UMLER file (see Note 6).

<p>D. The rebuilt year and rebuilt valuation of a private car will be utilized for the purpose of computing applicable mileage allowances subject to the following conditions:</p> <ol style="list-style-type: none"> 1. The car must be rebuilt in accordance with the current requirements of Rule 88, Section C of the Office Manual and Sections A&B of the Field Manual, AAR Interchange Rules. Application for official rebuilt status must be filed with AAR Technical Services and written formal approval received prior to the registering such car in the UMLER file with rebuilt age and valuation data. 2. Assignment of owned or leased rebuilt cars to value groups will be determined as outlined in Notes 4A, 4B and 4C herein, except that the maximum valuation of a rebuilt private car shall not exceed the lesser of: <ul style="list-style-type: none"> 75% of the original cost of a comparable new car; or 75% of the calculated replacement cost of the rebuilt car prior to rebuilding, as computed per AAR Interchange Rule 107. <p>E. MILEAGE RATE ALLOWANCE ON TANK "T" AND HOUSE CAR "XT" (SEE ITEM 196 FOR EXPLANATION OF DESIGNATING SYMBOLS) (See Note 1)	
EXPLANATION OF NOTES	
<p>5. For cars built or rebuilt subsequent to December 31, 1977, all values reported to the AAR UMLER file must be stated in equivalent US dollars based on the applicable exchange rate at the time such cars were built or rebuilt. Subsequent capitalized additions and betterments reported to UMLER must also be stated in equivalent US dollars at the time such improvements were made.</p> <p>6. Applies as follows:</p> <ol style="list-style-type: none"> A. Into service transportation costs are those freight charges associated with the movement of a car that is ready for its first load to the locations of the car's original installation into service. Other transportation charges incurred during construction (e.g., to a facility which installs the original lining, etc.) may be included in ledger value provided that the cost is capitalized. B. A capital expenditure is an expenditure intended to benefit future periods in contrast to revenue expenditure/current expense which benefits a current period. It is an addition to a capital asset and is initially reflected on the balance sheet. A capital expenditure normally is subject to depreciation in future years. C. An addition or betterment has the effect of: <ol style="list-style-type: none"> 1. extending the useful life of a car beyond the life projected when the car was entered into service; or 2. increasing a car's normal use beyond that which was in effect when the car was entered into service; or 3. lowering the operating costs beyond that which was in effect at the time the car was entered into service; or 4. otherwise adding to the worth of the benefits a car can yield beyond that in effect when the car was entered into service (e.g., enhance safety, etc.) <p>Any repair that maintains a car in its customary state of operating efficiency is NOT an addition or betterment.</p> D. An addition is the installation of a new component of a car (not a replacement) which meets the above tests. The value registered in UMLER shall be the cost of the component added, including labor. E. A betterment is the replacement of a component of the car with a superior component. The value registered in UMLER of a betterment should not exceed the cost of the superior component, including labor minus (1) the original value of the component that was replaced (i.e., retired) and (2) the cost (i.e., expense) incurred in removing the old component. F. When a unit of property is removed from a car (i.e., partial retirement), the ledger value registered in UMLER shall be reduced by the original value of the unit removed. G. Any cost recovered under AAR Defect Car Billing, if applicable, must be deducted from the cost of an addition or betterment.

Applies as follows:</p> <p>A. When an owner: (1) makes a valuation correction to the UMLER file; or (2) changes the mechanical designation of cars registered in the UMLER file; and such changes result in an increase or decrease in the mileage allowance rates, the Secretary, Business Services, AAR, will be so notified and the increase or decrease will be applied retroactively. Once cars have been reported to the UMLER file, any of the foregoing corrections or changes that result in a retroactive increase or decrease in the mileage allowance rates will be identified by the Secretary. The car owner is required to furnish the Secretary documented proof of the basis of the correction or change and advise as to any applicable mileage allowance adjustments which are required.</p> <p>B. Retroactive Mileage Allowance Decrease: Within five (5) months from the date of a change to the UMLER file resulting in a retroactive mileage allowance rate decrease, the owner will notify all using carriers of such decrease with either supporting details or a summary of the over-collections, with a copy to the Secretary. After receiving such notification, the using carrier shall deduct such amount(s), in the next open mileage reports to the car owner, plus fifteen (15) percent to reimburse the handling road for audit and associated administrative expenses. If the owner fails to send notification to the users within five months, the Secretary shall notify carriers of the car initial(s) and number(s) involved and the user(s) shall make an adjustment, as described above.</p> <p>C. Retroactive Mileage Allowance Increase: Within five (5) months from the date of a change to the UMLER file resulting in a retroactive mileage allowance rate increase, the owner will notify all using carriers of such increase with either supporting details or a summary of the under collections, with a copy to the Secretary. After receiving such notification, the using carriers shall add such amount(s) in their next open mileage reports to the car owner, less fifteen (15) percent to reimburse the handling roads for audit and associated administrative expense. No retroactive mileage allowance rate increase will be applicable if the owner fails to notify the using carriers of such increase within five (5) months from the date of a change to the UMLER file.</p>	<p>[I] - Increase.
