**EQUALIZATION OF MILEAGE ON TANK CARS OF PRIVATE OWNERSHIP**

**PART D (CONT'D)  
ANNUAL NATIONAL EQUALIZATION ACCOUNTING**

3. A private car company or owner failing to render complete payment for all excess empty mileage within thirty (30) days of the date its equalization statement is tendered by the AAR will be subject to a penalty of one and a half percent (1.5%) interest per month (i.e., annual rate of 18%) for each calendar month or fraction thereof on any outstanding balance due from the date of the AAR's invoice statement. If any portion of a private car company's or owner's equalization statement remains unpaid in excess of three (3) months from the date initially tendered, all mileage allowances accrued by the tank cars registered in the UMLER file bearing its reporting marks will be withheld by the carriers participating in this item until such time as complete payment including applicable penalty interest is made. Once complete payment is made, the participating carriers will be notified by the AAR and claims for any applicable mileage allowances withheld will be honored, less a 15% penalty charge for the carriers' administrative expense.

2. Close out dates specified in Part D may be extended by the AAR for a maximum of 60 days for special national accounting problem conditions, affecting substantially all carriers and all owners.
3. Invoices that have been issued which, after investigation, are determined to have been erroneous due to rail carriers or AAR accounting and/or system errors may be cancelled by the Secretary.

COLUMN 1	[I]COLUMN 2	[I][NC]COLUMN 3	4. Applies as follows:		
85001 - 86000	91.5	30.9	<p>A. For cars built between January 1, 1968 and July 1, 1991, assignment of owned or leased cars to value groups will be determined by the original cost as represented to the original buyer by the manufacturer's invoice price at the time of original installation into service. In the case of a manufacturer-lessor, the fair market value or the value which was certified, or would have been certified, for investment tax credit purposes shall be substituted therefore.</p> <p>B. Assignment to value groups of cars placed into service after July 1, 1991, will be determined by the original cost of the car to the original buyer as stated in the manufacturer's invoice. In only two circumstances, owners may certify an alternative "true value" in lieu of invoice price: (a) manufacturers who retain cars for their own leasing service; and (b) purchasers who can demonstrate that they contributed physical assets of significant value that were used by the manufacturer in fabricating a car, resulting in a reduction of the invoice price by more than \$1,000 per car below the price that otherwise would have been charged. For manufacturers, "true value" is the price for which a car or group of cars manufactured as a group would have been sold in an arm's length transaction. For purchasers who have made a qualifying contribution to fabrication, "true value" is the invoice price plus the depreciated value of the contributed assets distributed over the cars for which the assets were used, subject to the same limitations on "true value" which would apply to a manufacturer.</p> <p>"True value" shall not exceed the average price of similar cars registered in UMLER at invoice price within the most recent 12 months for which registration information is available in UMLER, adjusted for changes in the market values of new tank cars as reflected in average car prices. If the AAR determines by audit that a certified "true value" exceeds this value limit by an amount that causes a car to be placed in a higher allowance value bracket, the value of the car will be reduced to the appropriate value bracket. In addition, if the AAR determines by audit that a certified "true value" exceeds this value limit by an amount that causes a car to be placed in allowance value bracket more than one bracket above the otherwise applicable brackets, excess allowances paid as a result of the over valuation shall be reimbursed to the paying railroads.</p> <p>Those owners who certify a "true value" in lieu of invoice price during the calendar year must provide to the AAR an officer's certificate at the end of the year stating that, based on all information available to the owner, the owner has complied with the terms of this item. Car owners must supply for entry into UMLER all information required for tank cars in the UMLER Specification Manual. Notwithstanding any other provision of this tariff item, "true value" will be subject to audit directly by the AAR.</p> <p>C. If applicable, initial into service transportation costs, capitalized original lining costs, capitalized additions and capitalized betterments shall be added to car values determined pursuant to Paragraph A and B, above, if not already included in the value of the car. For cars built after January 1, 1988, capitalized inspection costs shall be added to the value, if applicable and if not already included in the value of the car. Values other than invoice price shall be identified in accordance with the current AAR UMLER format at the time cars are submitted to the Secretary Business Services, AAR, for registration in the UMLER file (see Note 6).</p>

EXPLANATION OF NOTES			EXPLANATION OF NOTES		
<p>1. Designating symbols (mechanical designation) will be assigned to car owner or lessee by the Secretary, Technical Services, Association of American Railroads, upon written application.</p> <p>2. For mileage allowance purposes, the service year of a car is calculated based upon year of construction of underframe. A car's first service year is the year built. Its second service year begins on January 1 of the year following the year built, with succeeding service years starting on January 1 of each following year. If the tanks' service year exceeds 30, the car's service year is considered to be in excess of 30 regardless of year of construction of underframe. For those cars constructed without an underframe, the car's service year is calculated based upon year of construction of tank. Service year is determined by subtracting the year of construction (built/rebuilt) from the current calendar year, plus 1, e.g., (2000 - 1970) + 1 = 31, or Service Years 31 and over allowance bracket.</p> <p>3. For cars built prior to January 1, 1968, assignment of owned or leased cars to value groups will be determined by the undepreciated base classification value. In addition, capitalized additions and betterments shall be added to the value if not already included in the BCV system.</p>			<p>Those owners who certify a "true value" in lieu of invoice price during the calendar year must provide to the AAR an officer's certificate at the end of the year stating that, based on all information available to the owner, the owner has complied with the terms of this item. Car owners must supply for entry into UMLER all information required for tank cars in the UMLER Specification Manual. ITEM 195-Y (CONT'D)	
MILEAGE RATE ALLOWANCE ON TANK "T" AND HOUSE CAR "XT" (SEE ITEM 196 FOR EXPLANATION OF DESIGNATING SYMBOLS) (See Note 1)	
EXPLANATION OF NOTES	
D. The rebuilt year and rebuilt valuation of a private car will be utilized for the purpose of computing applicable mileage allowances subject to the following conditions:	
1. The car must be rebuilt in accordance with the current requirements of Rule 88, Section C of the Office Manual and Sections A&B of the Field Manual, AAR Interchange Rules. Application for official rebuilt status must be filed with AAR Technical Services and written formal approval received prior to the registering such car in the UMLER file with rebuilt age and valuation data.	
2. Assignment of owned or leased rebuilt cars to value groups will be determined as outlined in Notes 4A, 4B and 4C herein, except that the maximum valuation of a rebuilt private car shall not exceed the lesser of:	
75% of the original cost of a comparable new car; or 75% of the calculated replacement cost of the rebuilt car prior to rebuilding, as computed per AAR Interchange Rule 107.	
E. All car ages and values submitted are subject to verification by the AAR, and audit by the AAR or the owners independent public accountant upon reasonable request by the AAR. If the car owner elects to have the audit performed by its independent public accountant, such audit must be performed in a timely fashion in the manner prescribed by the AAR, will be performed at the car owner's expense and must be duly certified by the car owner's auditor as representing the true value of all cars included in such audit. Failure of the car owner to furnish the required car valuation data to the AAR UMLER file, to arrange for the requested audit, or to correct errors determined as a result of such audit, will result in such car(s) being assigned to the lowest applicable mileage allowance rate group.	
F. Maximum original cost or fair market value will be as follows:	
1. For cars built in 1981 and prior	\$ 64,001
2. For cars built in 1982	\$ 58,001
3. For cars built in 1983	\$ 56,001

ITEM 195-Y (CONT'D)	
MILEAGE RATE ALLOWANCE ON TANK "T" AND HOUSE CAR "XT" (SEE ITEM 196 FOR EXPLANATION OF DESIGNATING SYMBOLS) (See Note 1)	
EXPLANATION OF NOTES	
5. For cars built or rebuilt subsequent to December 31, 1977, all values reported to the AAR UMLER file must be stated in equivalent US dollars based on the applicable exchange rate at the time such cars were built or rebuilt. Subsequent capitalized additions and betterments reported to UMLER must also be stated in equivalent US dollars at the time such improvements were made.	
6. Applies as follows:	
A. Into service transportation costs are those freight charges associated with the movement of a car that is ready for its first load to the locations of the car's original installation into service. Other transportation charges incurred during construction (e.g., to a facility which installs the original lining, etc.) may be included in ledger value provided that the cost is capitalized.	
B. A capital expenditure is an expenditure intended to benefit future periods in contrast to revenue expenditure/current expense which benefits a current period. It is an addition to a capital asset and is initially reflected on the balance sheet. A capital expenditure normally is subject to depreciation in future years.	
C. An addition or betterment has the effect of:	
1. extending the useful life of a car beyond the life projected when the car was entered into service; or	
2. increasing a car's normal use beyond that which was in effect when the car was entered into service; or	
3. lowering the operating costs beyond that which was in effect at the time the car was entered into service; or	
4. otherwise adding to the worth of the benefits a car can yield beyond that in effect when the car was entered into service (e.g., enhance safety, etc.)	
Any repair that maintains a car in its customary state of operating efficiency is NOT an addition or betterment.	
D. An addition is the installation of a new component of a car (not a replacement) which meets the above tests. The value registered in UMLER shall be the cost of the component added, including labor.	
E. A betterment is the replacement of a component of the car with a superior component. The value registered in UMLER of a betterment should not exceed the cost of the superior component, including labor minus (1) the original value of the component that was replaced (i.e., retired) and (2) the cost (i.e., expense) incurred in removing the old component.	
F. When a unit of property is removed from a car (i.e., partial retirement), the ledger value registered in UMLER shall be reduced by the original value of the unit removed.	
G. Any cost recovered under AAR Defect Car Billing, if applicable, must be deducted from the cost of an addition or betterment.
